ExhibitOffice + ManagEvent

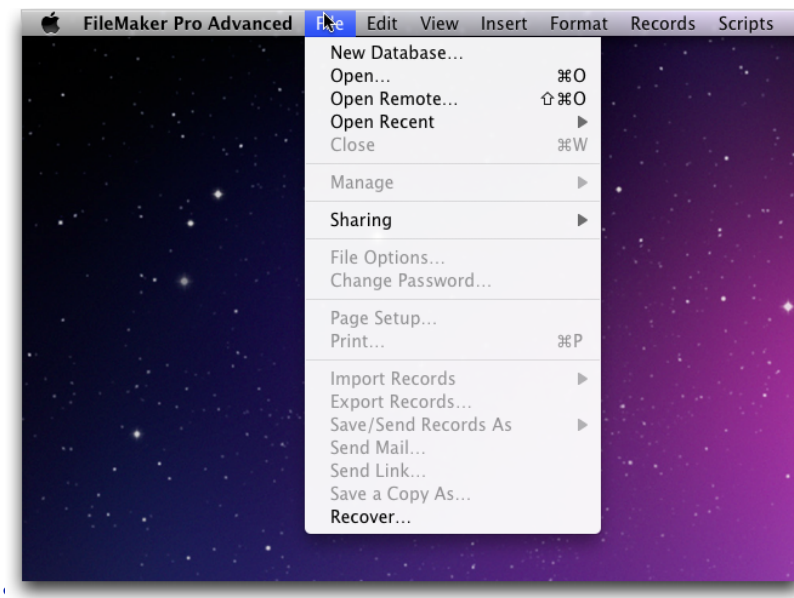

## VPN Access

If your computer technician sets up a VPN for you to access the database once you have logged onto the system there are a couple of steps to follow as the usual start up script will not work.

Once you are connected then start up Filemaker Pro.

This screen will come up then click Cancel  
Then go up to File "Open Remote"

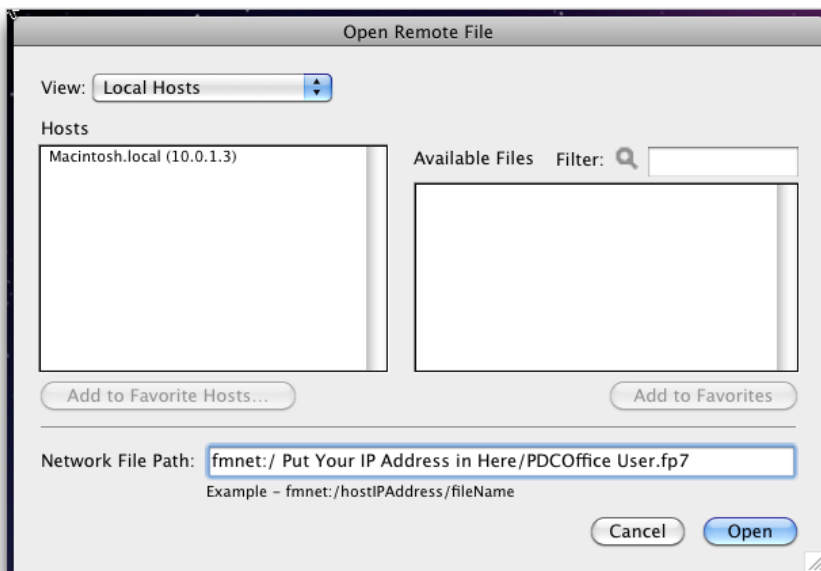

# Project Database Co

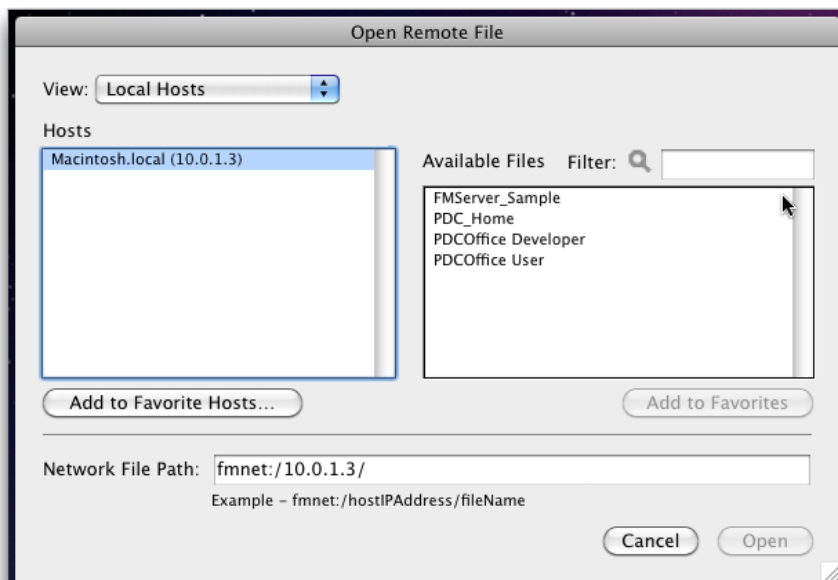

Developer of  
ExhibitOffice + ManagEvent

This screen will open up, enter the details in Network File Path along with the Host Computers IP Address (ask your Computer Technician for this)

When you are connected the Host computer name will appear on the left

Click on the Host Computer Name

Then Click on PDCOffice User and the database will open on your computer, put your log in details in and start work.
