## Computer Requirements

Review the current Database hardware and software requirements for below:

- Windows Client
- Windows Servers
- Mac Clients
- Mac Server

The server requirements comes down to how much money you can afford to spend. However, if you want the optimum configuration, then take these things into consideration in this order of priority:

- The server should ideally be dedicated to running only FileMaker Server software and hosting the databases. No other services should run here, including print services, file services, web services, etc. The database is disk intensive, so anything that competes for disk access time, will slow down its performance.
- Invest in fast hard drives. SCSI drives are best. Nothing will improve performance more than making sure you have fast drives in your server. Common drive sizes today such as 40, 80 or 120 GB sizes are all adequate.
- Invest in at least 1GB RAM, more if you want.
- If you can afford a little faster processor, and even a dual processor, then do so.
- Good UPS power backup for the server. Protect it from surges and power outages. Nothing damages files more than this issue. Although the files can be repaired, it is lost time and productivity.
- Redundant systems is the next thing to invest in. RAID drives so the system is always up is very important. Redundant power supplies is okay, but not as necessary.

## FOR WINDOWS CLIENTS

### Hardware Requirements

- Intel Pentium III 500MHz or higher
- 256MB of RAM
- CD-ROM or DVD drive
- SVGA (1024x768) or higher resolution
- Hard disk drive

### Software Requirements:

- Windows 2000 (SP4), Windows XP (SP2) Windows 7.
- FileMaker Pro 10 (can be purchased bundled with the Database from us).
- Outlook 2002+ is required for Contact, Event and Email integration to function.
- Microsoft Word and Excel 2000+ for Document creation

FileMaker Pro v9 and earlier FileMaker Pro versions are not compatible with the Database.

### Network Sharing Requirements:

- Microsoft TCP/IP or IPX/SPX network

## FOR WINDOWS FILEMAKER SERVER v10 1- 50 CLIENTS

### Hardware Requirements

- DualCPU / Core Duo
- 1 GB of RAM (2GB recommended)
- CD-ROM or DVD drive
- Hard disk drive (the faster the better; SCSI preferred) (recommend 80GB free space)

### Software Requirements:

- Windows 2003 Server Standard Edition SP2, Windows 2008 Server SP1 or Windows Vista Business Edition
- FileMaker Server 10 (for workgroups larger than 3. Can be purchased bundled with the database from us)

FileMaker Server v8 is not compatible with the Database.

### Network Sharing Requirements:

- Microsoft TCP/IP or IPX/SPX network

## 50+ CLIENTS

### Hardware Requirements

- Pentium 3.4 GHz
- 2 GB of RAM
- CD-ROM or DVD drive
- Hard disk drive (the faster the better; SCSI preferred) (recommend 80GB free space)

### Software Requirements:

- Windows 2003 Server Standard Edition SP2, Windows 2008 Server SP1 or Windows Vista Business Edition
- FileMaker Server 10 (for workgroups larger than 3. Can be purchased bundled with The Database from us)

FileMaker Server v8 is not compatible with the Database. On Windows 64 bit editions FM Server requires the 32 bit version of Java 6 upgrade 7

### Network Sharing Requirements:

- Microsoft TCP/IP or IPX/SPX network

64 Bit is not supported by Filemaker it will work in some situations please contact us for more information

## FOR MAC OS X CLIENTS

### Hardware Requirements:

- Macintosh computer with PowerPC G4 or G5 processor
- Intel based Mac running Rosetta
- 1GB of RAM
- CD-ROM or DVDdrive
- Hard Disk drive

### Software Requirements:

- Mac OS X 10.3.9 or Mac OS X 10.4
- Entourage X or Entourage 2004, or the latest versions of Apple iCal, Mail and Address Book are required for Contact, Event and Email integration to function.
- FileMaker Pro 10 (can be purchased bundled with the Database from us).

FileMaker Pro v8 and earlier version are not compatible with the Database.

### Network Sharing Requirements:

- Microsoft TCP/IP

## FOR MAC OSX FILEMAKER SERVERS 1- 50 CLIENTS

### Hardware Requirements

- Dual G5
- Not supported on Intel Mac running Rosetta at this time
- 1GB of RAM (2GB recommended)
- CD-ROM or DVD drive
- Hard disk drive (the faster the better; SCSI preferred) (recommend 80GB free space)

### Software Requirements:

- Mac OS X Server (10.4.Server Version)
- FileMaker Server 10 (for workgroups larger than 3. Can be purchased bundled with the Database from us)

FileMaker Server v8 or earlier versions are not compatible with the Database.

### Network Sharing Requirements:

- Microsoft TCP/IP

## 50+ CLIENTS

### Hardware Requirements

- Dual Core Intel
- Not supported on Intel Mac running Rosetta at this time
- 2GB of RAM
- CD-ROM or DVD drive
- Hard disk drive (the faster the better; SCSI preferred) (recommend 80GB free space)

### Software Requirements:

- Mac OS X Server (10.5.4)
- FileMaker Server 10 (for workgroups larger than 3. Can be purchased bundled with the Database from us)

FileMaker Server v8 or earlier versions are not compatible with the Database.

### Network Sharing Requirements:

- Microsoft TCP/IP
