Project Billing Summary

This section will only be used by a company that bills purely by the hour.

Each phase will have either a fixed cost that has been set at the quotation stage and the charge will be based on the number of hours it is expected to take to complete that stage.

It tracks

- Budgeted hours for each phase
- Actual hours for each phase
- Invoiced amounts for each phase
- It is a very powerful tool for those that do bill in this way.
